## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Allowable Subject Matter*

2. Claims 1-6, 8-23, 25-30 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to disclose or make obvious an optical sensor for determining concentration of dyes and/or particles in liquid or gaseous media having the transmitting unit and the receiving unit are secured to the at least one measuring head defining the absorption section and can be secured adjustably in different positions on the at least one measuring head, and in combination with the other recited limitations of claim 1. Claims 2-6, 8-22, 27-30 are allowed by the virtue of dependency on the allowed claim 1.

Regarding claim 23, the prior art fails to disclose or make obvious a method for operating an optical sensor having a semiconductor transmitting element which emits light rays and a semiconductor receiving element onto which the emitted light rays are guided where the emitted light rays penetrate an absorption section filled with liquids or gaseous medium having the steps of where the reference extinction value is formed according to the equation  $E_{cal} = \lg(I_o / I_{cal})$ , wherein  $I_o$  and  $I_{cal}$  represent the signals received at the semiconductor receiving element for a dye-free and/or particle-free reference medium arranged in the absorption section and a reference

medium with a predetermined dye concentration and/or particle concentration Ccal of the dye and/or particles to be determined, and in combination with the other recited limitations of claim 23. Claims 25-26 are allowed by the virtue of dependency on the allowed claim 23.
